

CURRICULUM VITAE

Fan YANG, Ph.D.

Lab of microorganism resource and biocatalyst
Dalian Polytechnic University
#1 Qinggongyuan Dalian, China
Phone: 86-411-8631-8692
Email: yang_fan@dlpu.edu.cn

Experiences

- Associate Professor (2011-present): Dalian Polytechnic University, CHINA
- PhD and MS (2004-2011): Dalian Institute of Chemical Physics, Chinese Academy of Sciences, CHINA
- BS (2000-2004): Dalian University of Technology, China

Research Experience

- I. **Molecular Mechanism of Lipid Accumulation in Oleaginous Yeasts.** Including: i) studies on the genetic constitutions of lipid-accumulation yeasts; ii) the determination of genes mainly attributed to the lipid accumulation process; and iii) providing the possible biochemical explanation for different lipid accumulating capabilities of individual oleaginous yeast.
- II. **Xanthan biodegradation mechanism.** Including: i) the genome study of xanthan-degrading strain; and ii) xanthan degradation route and related enzymes; iii) rational engineering of xanthan-degrading strain.
- III. **Inulin hydrolysis mechanism and yeast rational engineering:** i) Reveal the regulation mechanism of SUC2-mediated inulin catabolism in *S. cerevisiae*. and ii) Provides an insight into the role of post-translational modifications in regulating the stability and activity of SUC2. iii) Determine the effect of SUC2 location on the inulin hydrolysis capability of *S. cerevisiae* strains.

Representative Publications

- F. Yang**, L. Li, Y. Si, M. Yang, X. Guo, Y. Hou, X. Chen and X. Li. Complete genome sequence of a xanthan-degrading *Microbacterium* sp. strain XT11 with the potential for xantho-oligosaccharides production. *Journal of Biotechnology* **222**, 19-20 (2016).
